Front-End Developer with 1+ year of professional experience and 12+ delivered projects across healthcare, SaaS, and business domains. Proficient in ReactJS, NextJS, JavaScript and TypeScript, with a strong focus on building responsive, user-friendly interfaces. Skilled in communication and collaboration, ensuring smooth teamwork with cross-functional teams. Experienced in using AI tools such as GitHub Copilot and ChatGPT to accelerate development, improve debugging, and enhance productivity.

Work Experience

Job

- **AG InfoTech** September 2024 - Present
Front-end Developer -Hybrid
 - Delivered **12+** projects across diverse industries, focusing on scalable, responsive, and accessible web solutions.
 - Built applications using **ReactJS, NextJS, JavaScript and TypeScript**, ensuring clean code and maintainable architecture.
 - Collaborated closely with cross-functional teams, enhancing communication and teamwork to meet client requirements.
 - Developed user interfaces without design files when necessary, recreating accurate layouts from images and references.
 - Integrated AI-powered tools to streamline workflows, assist in testing, and improve project delivery.
 - Managed source code with **Git and GitHub**, maintaining version control and hosting projects for collaborative development and deployment.
 - Contributed to both development and quality assurance, ensuring reliable and user-friendly releases.

Internships

- **AG InfoTech** June 2024-August 2024
Front-end Intern -Remote
 - Completed 6 hands-on projects during internship, including dynamic tables, job portals, and management systems.
 - Recognized for strong performance and offered a full-time role immediately after internship.
 - Applied ReactJS and NextJS to create interactive and production-ready applications.
 - Learned and practiced effective client communication, presenting work clearly and collaborating with peers.
 - Experimented with AI-assisted development tools, improving code efficiency and debugging processes.
- **Pakistan Telecommunication Company Ltd.** August-September, 2023
Network & Systems Intern -Onsite
 - Gained hands-on exposure to network establishment and operations, including CRM systems and optical fiber infrastructure.
 - Learned to work with network element tracking portals and enterprise-level systems.
 - Improved technical communication by collaborating with engineers and reporting findings clearly.
 - Built a foundation in large-scale system management and troubleshooting.

● Pakistan Institute of Medical Sciences

September 2022

Graphic Design Intern

-Onsite

- Completed training in graphic design and web design, applying tools like Canva, Adobe Illustrator, Photoshop, and Figma.
- Designed visually engaging graphics and layouts, strengthening UI/UX awareness for web projects.
- Contributed to the organisation's digital presence, helping improve engagement and outreach.
- Enhanced creative communication skills by presenting design ideas to mentors and peers.

Education

● Fatima Jinnah women University, Rawalpindi

2020-2024

- Bachelor of Software Engineering

Final Year Project

● Empowering Dyslexia Learners using AI via VR

- Lead team in developing a VR project for dyslexia support, enhancing reading, comprehension, and language skills. Collaborated with educational experts, managed project, and ensured platform effectiveness and accessibility.
