

Unaiza Zafar

Full-Stack Developer

Professional Summary

Full-Stack Developer with around 3 years of experience building scalable web applications using React.js, Next.js, TypeScript, and modern JavaScript. Currently leading development of RBAC portal dashboards as project lead, owning technical architecture, after transitioning from a frontend specialization into full-stack ownership with Next.js, Supabase, and PostgreSQL. Experienced building real-time data sync features, RBAC systems, and interactive canvas-based UIs with Fabric.js. Comfortable working in Agile environments and leveraging AI-powered tools to accelerate development. Passionate about building end-to-end, high-performance solutions that enhance product quality and user experience.

Work Experience

Full Stack Developer, BX Track Solutions

Sep 2025 - Present

Rawalpindi, Pakistan

- Served as project lead for 2 role-based portal dashboards, owning technical architecture and coordinating task delegation across a 4-7 member team, delivering both projects on schedule
- Built full-stack features using Next.js (API routes) and Supabase, integrating authentication and PostgreSQL data modeling to support multiple user roles with distinct permission levels
- Built real-time data sync features with Supabase, replacing manual update processes and improving data accuracy across the dashboards
- Developed interactive canvas-based UI features using Fabric.js for dashboard visualizations, enabling admin users to manipulate and customize data views directly without engineering support
- Integrated RESTful APIs across frontend and backend layers, improving consistency between client and server state and reducing data-related issues flagged by QA
- Architected a RBAC system supporting multiple user roles, ensuring secure and scalable multi-tenant portal access
- Coordinated with frontend developers as project lead while owning backend architecture, keeping both projects on schedule despite competing priorities

Front-end Developer, AG InfoTech

Sep 2024 - Aug 2025

Islamabad, Pk - Hybrid

- Created 6+ projects across healthcare, SaaS, and business industries, ensuring scalable, responsive, and accessible web solutions.
- Built and deployed full-stack applications with React.js, Next.js, TypeScript, ensuring 100% code reusability through modular architecture.
- Improved sprint delivery timelines through Agile practices (Jira), contributing to faster release cycles and reduced backlog delays.
- Integrated RESTful APIs to enable real-time data sync, resulting in smoother user experiences and fewer data-related issues reported by QA.
- Recreated pixel-perfect UIs from Figma and static assets when no design files were provided, accelerating delivery and maintaining design consistency.

Skills

FRONTEND

- **Strong Proficiency in** Advanced JavaScript (ES6+), DOM Manipulation, JavaScript Object Model, TypeScript
- **Thorough Understanding of** React.js, Next.js, React Native, Fabric.js, JSX, Functional Components, Hooks, Custom Hooks, Class-Based Components, React Render under the Hood, React Router v6, React Design Patterns, Higher Order Components (HOCs), Styled Components, React Query, React Hook Form, Redux, Redux Toolkit, Context API, React Testing Library, Component Unit Testing, End-to-End Testing Libraries, Webpack Module Bundler, Build Optimization, Role-based UI systems, Interactive dashboards, Portal-based architecture
- **Good Understanding of** Asynchronous Request Handling (async/await, Promises), Virtual DOM, Partial Page Updates, Reconciliation, RESTful APIs (JSON, Axios, Fetch API), Package Managers (NPM, NPX, Yarn), Version Control (Git & GitHub – branching, pull requests, repositories), Code Quality (ESLint, Prettier), Deployment (Vercel)
- **Proficient Understanding of** Web Markup & Styling HTML5, CSS3, SASS/SCSS, Tailwind CSS, Bootstrap 5, Material UI, GSAP, React Framer Motion, Responsive Design Principles, Cross-Browser Compatibility, Accessibility Standards (WCAG)
- **UI/UX & Design Tools** Figma (wireframe to React component conversion), Adobe Illustrator, Adobe Photoshop

- Enhanced user engagement with advanced animations (Framer Motion, GSAP), leading to positive client feedback and repeat feature requests.
- Leveraged AI tools (GitHub Copilot, ChatGPT) to prototype features and debug faster, shortening development time for selected modules.
- Executed structured Git workflows (branching, pull requests, reviews), enabling error-free deployments and smoother team collaboration.
- Supported QA efforts, contributing to fewer post-release fixes and more stable production releases.

Front-end Intern, AG InfoTech

Jun 2024 - Aug 2024

Remote

- Completed 6 hands-on projects, including dynamic tables, job portals, and management systems
- Recognized for strong performance and offered a full-time role immediately after the internship
- Applied React.js and Next.js to create interactive applications
- Developed strong client communication skills by presenting work clearly and collaborating effectively with peers.
- Experimented with AI-assisted development tools, improving code efficiency and debugging processes

Network & Systems Intern, PTCL

Aug 2023 - Sep 2023

Rawalpindi, Pk - Onsite

- Assisted in CRM and tracking portal management used by 500+ employees, contributing to smoother workflows and faster internal task completion.
- Documented processes with engineers, improving reporting clarity and reducing escalation time by 10%.

Graphic Design Intern, PIMS

Sep 2022

Islamabad, Pk - Onsite

- Designed 5+ UI/UX layouts using Canva, Illustrator, Photoshop, and Figma, improving content quality and increasing adoption of digital templates within teams.

Educational Background

Bachelor of Software Engineering

Fatima Jinnah Women University, Rawalpindi

Sep 2020 - July 2024

Skills

BACK-END & API

INTEGRATION

RESTful API Integration (Fetch, Axios, JSON handling, async/await), RBAC, Prisma ORM, Supabase (Auth, Realtime, PostgreSQL), Next.js API Routes, Server-side rendering (SSR) & Server Actions (expanding backend expertise)

VERSION CONTROL &

COLLABORATION

Git, GitHub (repositories, branching, PRs), Agile methodologies, Scrum practices, Clickup

AI & PRODUCTIVITY TOOLS

GitHub Copilot (AI-assisted code completion and debugging), ChatGPT (workflow optimization and learning), AI-powered testing and documentation support, Cursor, Claude

TOOLS & PLATFORMS

Cursor, VS Code, Figma, Postman, Visual Studio, Microsoft Azure, Microsoft Office Suite, AWS S3

PROFESSIONAL

COMPETENCIES

Effective communication with clients and teams, Cross-functional collaboration with designers and backend developers, Analytical problem-solving and debugging, Adaptability and continuous learning, Project and time management
